RADICAL BY NATURE

**REATIVE
RÄUME**

Radical by Nature

At Mogu, we bring Nature
closer to people, meeting the
needs of everyday life.

A vision of home, offices,
retails and spaces that embraces
Nature's radical character and
Circular Economy principles.

100% circular soul

As a company fully rooted in the principles of Circular Economy, at Mogu we constantly observe the environment, the society we're part of and the related economies, to promptly respond to the needs emerging from such complex and interconnected systems.

Mycelium technology

Our technology strongly relies on partnering with fungal microorganisms and on employing their vegetative body - the mycelium - as key ingredient to bind and transform different typologies of residual substrates, turning them into functional, high value materials.

From biotechnology to finishing materials

We produce materials
by growing selected
strains of mycelium
on pre-engineered
substrates made
of agro-industrial
residues.

our solutions for
premium living spaces

Acoustic panels

Wall panels

Acoustic Panels

Mogu Acoustic modules are made from soft, foam-like mycelium materials and are designed as modular elements that can fit into any design style.

Mogu Acoustic modules are made from soft, foam-like mycelium materials and are designed as modular elements that can fit into any residential style.

Introducing FORESTA system

An innovative
acoustic system
based on wood and
mycelium

mogu
RADICAL BY NATURE

ARUP

System Design

The Foresta System combines the refined aesthetics of wood with the innovative character of mycelium materials.

The wooden components of Foresta are manufactured by means of the latest technologies in wood processing, such as product parametric modeling, robotized production lines and advanced manufacturing.

Digital & Modular

The Foresta System design valorises the infinite possibilities given by digital fabrication and parametric modelling, to maximize design flexibility at its best!

Introducing PLUMA Panels

PLUMA is a new collection of slim, 100% circular wall covering panels with sound absorbing properties. They are designed to give an innovative and natural look to all spaces.

Unique Design Surfaces

The new PLUMA panels, thanks to their limited thickness and to their modular design, allow for creating infinite solutions and compositions, meeting the needs of any space.

Unique Design Surfaces

Mogu design team has developed four different textures inspired by the perfect shapes of nature: Reed, Leaves, Needles and Mycelium. Unique creations capable of flexible adaptations, to harmoniously enhance all types of surroundings

Product type	Resilient Flooring
Fire Reaction	C-fl
Density	700 kg/m ³
Installation	glue-based
Residual indentation	0.09 mm
Abrasion resistance	T - type I
Castor chair	No damage
Furniture leg	No change
Slip resistance	$\mu \geq 0.30$ (DS class)
Electrical behaviour	$R > 10^9 \Omega$; ≤ 2 kV
Impact sound insulation	C (<85 dB); 2 dB
Dimensional Stability	-0.15% (no curling)
Moisture resistance	+0.4 mm (23°C; 30-90% RH)
Chemical Resistance*	
UV fastness	7 (no visible change)
VOC Emissions	Gold (including topcoat)

Mogu Tiles

Mogu Flex

From agro-industrial residues to luxury living environments, Mogu Floor Flex is a collection of bio-based resilient rolls for interior design and architecture.

Mogu Flex

Product type	Floor covering
Fire Reaction	Cfl-s1
Density	1060 kg/m ³
Installation	glue-based
Residual indentation	0.09 mm
Castor chair	No damage (type W)
Furniture leg	No change
Slip resistance	$\mu \geq 0.30$ (DS class)
Electrical behaviour	$R = 2,2 \times 10^{11} \Omega$; -0,4kV
Impact sound insulation	C (<85 dB); 2 dB
Dimensional Stability	-0.15% (no curling)
Thermal resistance	0,02 m ² K/W
Moisture resistance	+0.4 mm (23°C; 30-90%RH)
Chemical Resistance*	No change (with wear leayer)
UV fastness	7 (no visible change)
VOC Emissions	Gold (including topcoat)

COMPRESSION TECHNOLOGY

Mogu Floor tiles are produced thanks to heat pressing technology. The formulation has been developed according to continuous pressing standards.

NATURAL BINDING

Thanks to mycelium technology, loose fibers are bound together and react with the heat of compression technology. The result is a 100% natural and biodegradable core, with comparable mechanical properties to HDF.

PLUMA COLOR PALETTE

from waste to virtuous chemistry

Mogu FLEX is based on a unique formulation based on 67% renewable resources, free from solvents, plasticizers, heavy metals and with low VOC emissions.

Mogu Floor is also available as 2.5 mm resilient covering (roll or tile form)

polyol	22%
isocyanate from renewable resources	26%
biofiller	50%
other additives	2%

up to
67% biobased content
